Smart socket

User Manual

- If you only use the device through Apple "Home" app, please refer to section 2.2 (Add devices to the Home app).
- If you want to use the CozyLife app, Google Assistant and Alexa Echo to control the device, please follow section 2.1 (Add devices to the CozyLife app) and then follow section 2.2 (Add devices to the Home app).

1.Features

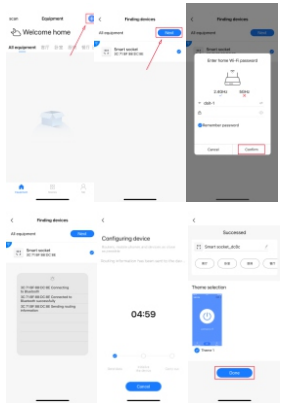

- With smart phone control, you can control your device from anywhere
- Voice control: compatible with Alexa Echo and Google Assistant
- Timing function: automatic on/off with timing function
- Smart scene
- Equipment group

2.Add Devices

2.1 Add devices to the CozyLife app

Step 1: Download CozyLife app: Scan the following QR code to download “CozyLife” app.

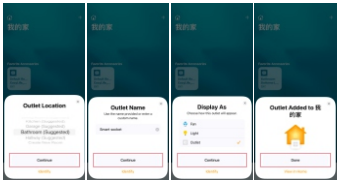

Step 2: Enter the phone settings option, enable Bluetooth and WiFi functions, and turn on the product at the same time (the default is "factory mode" when the product is used for the first time. Please refer to "FAQ 1" for how to restore to "factory mode")
Step 3: Open CozyLife app, the device was automatically discovered and a prompt message will be shown at the "+" at the upper right corner;
Step 4: Click "+" at the upper right corner, select the device to be connected, then click “Next” to enter the WiFi setting page;
Step 5: Enter the WiFi password, wait for the network configuration to be completed (only 2.4G WiFi network is supported);
Step 6: After the WiFi is connected, Name your devices and assign it to a room to help you identify it in the CozyLife app.

2.2 Add devices to the Home app

Step 1: Turn on your "Home" APP and turn on the light bulb at the same time;
Step 2: Click "Add or Scan Accessories", scan the QR code shown in the picture below, or click "I don't have or can't scan the code" and enter the 8-digit code below the QR code.

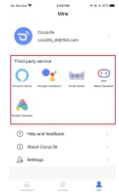

3.How to use smart speakers to control devices, such as Amazon Alexa, Google Assistant, Tmall Genie or Xiaomi?

Open the CozyLife app to enter the "Me" view and find the user guide for the corresponding smart speaker.

【Note: Before using the smart speaker, please log in to your account on Amazon Alexa, Google Assistant, Tmall Genie or Xiaomi.】

4.FAQ:

4.1. How to reset the device to factory mode?

After turning on the power, press and hold the power button for 3 seconds, the indicator light flashes red, and the factory settings are restored.

4.2. If I have added the device through Home app, but now I want to use CozyLife app and intelligent speaker to control devices, what should I do?

Please reset the device to "factory mode" according to "FAQ 1", and follow section 2.1 (Add devices to the CozyLife app) and then follow section 2.2 (Add devices to the Home app).

4.3. If the device cannot be successfully added in the homekit app, it is recommended that you add the homekit device in the cozylife app

Confirm that the device is in the factory mode, first use cozylife to add the device, a "support homekit" prompt appears, click "OK" to enter the "add homekit device" to scan the code or enter the 8-digit code to add (some iPhones will appear in the cache, wait for 5 seconds before proceeding Add to)

4.4.For more technical questions, please search the official account "SZIDOIT", or scan the QR code below to add:
